

RISHWANTH RAVI

.NET Developer

[in LinkedIn](#) | [+91 6381857561](#) | [Portfolio](#) | [M rishikathron@gmail.com](#) | [GitHub](#)

Summary

- Experienced **Software Engineer Analyst** with 3 years in software development, specializing in **.NET** and **Angular**. Proficient in both frontend and backend technologies including **.NET Core**, **Web API**, **Angular 15**, and **Entity Framework**. Skilled in **C#**, **Python**, **SQL**, and familiar with **RESTful services** and modern development tools. Excellent **communication** and **ownership** skills, with a proven ability to deliver dynamic, user-centric applications. A collaborative team player with a passion for **consistency**, **problem-solving**, and effective **design patterns**.

Skills

- Backend:** .NET Core | Web API | Entity Framework | Data Structures | LINQ | Debugging
- Frontend:** Angular 15 | JavaScript | HTML & CSS | Typescript | RESTful Services | Basic knowledge on React
- Testing:** Postman | Nunit-Framework | Code Analysis | Optimization Testing | Basic knowledge on JEST
- Database:** PG Admin | PL/SQL | Stored Procedures
- Programming Languages:** C# | Python | SQL
- Development Tools:** Visual Studio | Visual Studio Code
- Version Control:** Git | GitHub | TFS/GIT
- Soft Skills:** Critical Thinking | Problem-Solving | Communication | Design Patterns | Attention to Detail | Analysis

Experience

Application development Analyst	Accenture	2023 - Present
Orchestrated requirement gathering, prioritization, design planning, and intricate page development using C#, .NET Core, PL/SQL, Visual Studio 2022, and Agile methodologies. Developed comprehensive RESTful APIs with full functionality integrating .NET Web API and Entity Framework on the backend, and Angular on the frontend for seamless data interaction and user interface. Led a team of 3 to automate data processing across environments, employing S3 Bucket, Excel Engine, and Windows Service. Utilized data structure concepts to optimize for 97% efficiency, facilitating the seamless daily processing of thousands of claims. Analyzed and optimized API performance, fine-tuning and troubleshooting APIs to achieve linear complexity and 90% efficiency, utilizing data structures, Entity Framework, and stored procedures. Implemented Stored Procedures in PL/SQL to enhance database performance and Streamlined data retrieval and manipulation resulting in a 30% reduction in query execution time and optimized APIs for improved efficiency and backend performance. Created an approach using design patterns for automating the periodic manual process of filtering Excel files, reducing workload by 88% and execution time from over 40 minutes to under 5 minutes, using .NET Core, S3 Bucket, and Windows Service. Consumed RESTful APIs within Angular applications, ensuring seamless data integration and real-time updates with data subscription. Integrated and consumed APIs in Angular applications to ensure seamless frontend-backend communications. Received STAR OF THE MONTH Award and ACCENTURE CELEBRATES EXCELLENCE for leadership and communication within a 3-member team, resulting in annual savings of over 320 man-hours.		
Application development Associate	Accenture	2021 – 2023
Developed, tested, debugged, and documented 33+ software applications following established coding standards and methodologies. Architected and Built 50+ APIs based on user stories, requirements, specifications, enhancing project scalability and functionality. Automated user tools, resulting in efficiency gains of 200+ hours annually and reducing manual workload by 95%, streamlining operations. Coached 3 junior engineers on best practices, fostering skill development and team cohesion Collaborated effectively within cross-functional teams to build project modules and resolve issues, demonstrating strong teamwork and communication skills.		

Achievements

- **Excellence Award (ACE Award):** Recognized for outstanding proficiency and development excellence during FY23-Q4, including a cash reward, for leadership in guiding a team of three members to success.
- **Star of the Month:** Honored for exceptional dedication and contributions that significantly enhanced team success and project outcomes.
- **Best Project Idea Innovation Award:** Honored for bringing out a Project idea that solves the solution of Agriculture, considered best Idea for solving the needs of Agriculturist.

Education

Bachelor of Technology

Sri Sairam Engineering College

West Tambaram

2017 - 2021

- Majored in Computer Science
- CGPA 8.01/10

Certifications

- Programming in Python Certification
- Data Structures and Algorithms in Python Programming
- Azure DP-900
- PEGA Certified System Architect (CSA)
- PEGA Certified Senior System Architect (CSSA)

Projects

- **Portfolio Website:** Conceptualized and crafted a personal portfolio website to highlight skills, showcase projects, and outline professional experience. Utilizing HTML5, CSS3, and Typescript within the Angular framework, Integrated responsive design principles to ensure seamless compatibility across diverse devices and screen sizes.
Links: [Portfolio_GitHub](#) [Portfolio_Netlify](#)
- **Attendance Management Using Image Processing:** Created an Image Recognition Attendance Management System using python and Open-CV and automated the Attendance record daily and store the data in the server without the need of manual work.
Links: [AMS_GitHub](#)
- **To-Do App:** Created a to-do application as a practical exploration of Typescript programming language functionalities, accompanied by straightforward CSS styling.
Links: [Todo_GitHub](#) [Todo_Netlify](#)
- **Monkey Type clone:** A clone of the popular typing practice tool Monkey Type, enhancing typing proficiency via a web-based interface. Implemented **real-time typing tests** and **analytics**, resulting in improved typing speed and accuracy for users.
Links: [MonkeyType_GitHub](#)
- **E-commerce:** Developing an e-commerce platform to focus on APIs, Typescript, JavaScript, and related frameworks. Aimed at mastering core fundamentals through practical implementation and integration for enhanced functionality and user experience.
